

A STRATEGIC COLLABORATION PROPOSAL

Connecting Macao's AI Future

AI literacy for all. Youth co-creation. Macao-Hengqin
conversion. International collaboration.

From AI Promotion to Measurable Public Value

Move from isolated awareness events to an evidence-led system that compounds capability and public value.

EVENT-ONLY LOGIC

Awareness without a pathway

- Counts attendance, not learning or adoption.
- Ends when the venue closes.
- Leaves partners without a shared record.

ACCOUNTABLE DELIVERY SYSTEM

Evidence that compounds

- Maps each activity to a policy priority.
- Links communities, youth, enterprises and partners.
- Reports only what can be verified.

Policy Direction Creates One Shared Route

The Macao SAR Economic and Social Development Third Five-Year Plan (2026–2030) gives this proposal four connected policy anchors.

01 Education, Science & Talent Build applied capability through education, technology and talent together. 	02 Economic Diversification Let industry problems guide innovation and enterprise adoption. 	03 Macao–Hengqin Integration Create practical routes from Macao R&D to Hengqin conversion. 	04 External Connectivity Use Macao’s international and China–Portuguese-speaking-country connections.

THE PUBLIC FOUNDATION

School learning, teacher development and community literacy are already advancing.

03 / FOUNDATION + CONVERSION

Build on Government's foundation—then add conversion.

Macao is advancing coding and AI education in schools, teacher development, smart teaching and all-age community AI literacy.

THE COMPLEMENTARY CONVERSION LAYER

-  International cases, locally applied
-  Real industry briefs for youth teams
-  Enterprise settings and outcome tracking

Positioning: complement public programmes; do not duplicate them.

A Coordinated Window Enables Local Delivery

Formal representative status, specific roles and public commitments remain subject to authorization and written confirmation.

ECI Offers a Verifiable Innovation Platform

The contribution is framed through sourced, public evidence—not unverified scale claims.

Innovation assessment

ECI Awards publicly positions its work around the “Effectiveness of Innovation” in the digital economy.

SOURCE / ECI AWARDS

Regional connection

The 2026 ECI Festival linked Guangzhou, Hong Kong and Macao, including a focus on AI literacy and youth innovation.

SOURCE / PEDAILY REPORT

Youth co-creation

Public university reporting documents ECI Young’s training, mentoring, competition and project-presentation model.

SOURCE / UNIVERSITY REPORT

Evidence boundary: use public, traceable sources unless supporting documents are separately verified.

Designed for residents, youth, enterprises and the world.

Each programme line shares governance, evidence standards and an annual review point.

A

AI for Every Resident

Trusted, practical and inclusive AI literacy through community learning, responsible-use awareness and local facilitators.

PUBLIC VALUE

Inclusion & safe use

B

AI Young × Macao–Hengqin

Real industry briefs, cross-campus teams and a disciplined route from prototype to pilot, placement or incubation.

PUBLIC VALUE

Talent & conversion

C

International Innovation Bridge

Curated cases, expert dialogue and traceable cooperation pipelines across the GBA and Portuguese-speaking-country links.

PUBLIC VALUE

External connectivity

AI literacy must be trusted and practical.

Deliver trusted, everyday AI learning through community settings and local facilitators.

Design for different age groups, including residents otherwise excluded from digital adoption.

Test responsible-use understanding, not attendance alone.

PILOT EVIDENCE

Active sites · completed sessions · learning completion · competency gain · senior coverage · responsible-use assessment

COMMUNITY LEARNING / LOCAL FACILITATION

AI Young Turns Real Briefs into Next Steps

Youth teams respond to live industry and community challenges through a disciplined pathway.

RESULT SOUGHT

Youth capability becomes visible through reviewed work and credible progression—not certificates alone.

International Exchange Must Become a Cooperation Pipeline

Create a trackable cooperation route across the Greater Bay Area and Portuguese-speaking-country links.

SUCCESS MEASURE

Quality and conversion of cooperation—not the number of events or introductions.

One Proposition, Tailored to Every Public Mandate

Each counterpart sees a distinct public-value case, a practical collaboration route and a shared evidence standard.

COUNTERPART	COLLABORATION ROUTE	PROPOSED EVIDENCE
Social Affairs & Culture	Inclusive AI literacy and community participation	Completion by age group; competency gain; senior coverage
Education & Youth	Educators, mentors, youth projects and progression	Schools engaged; reviewed projects; placement referrals
Science Associations	Quality-controlled last-mile community delivery	Active sites; mentor retention; learning completion
Economy & Technology	Enterprise needs to evaluated proof of concept	Needs diagnoses; completed PoCs; continued use
IPIM	Qualified international cooperation pathways	Qualified leads; matched dialogues; referrals

All metrics shown are proposed evidence indicators; they are not performance results or Government commitments.

Inclusion That Can Be Evidenced

Proposed pathway for all-age inclusion, community participation and trusted AI literacy.

12-MONTH PACING / PROPOSED

PLANNING CONDITION

Targets remain subject to a confirmed baseline, capacity, resources and departmental agreement.

Capability That Continues

Proposed pathway for educator capability, youth projects and credible progression opportunities.

EDUCATION PARTNERS

8

partners / annual scenario

MENTORS COMPLETING REVIEW

30

mentors / annual scenario

LIVE INDUSTRY BRIEFS

5

briefs / annual scenario

DESIRED OUTCOME

Reviewed youth portfolios with credible next-step opportunities—not certificates alone.

EDUCATORS	MENTORS	YOUTH TEAMS
Applied learning support	Quality review and coaching	Projects, portfolios and referrals

Trusted Last-Mile Delivery

Local science and community organisations can make AI learning accessible, culturally relevant and continuous.

DELIVERY PRINCIPLE

Translate central resources into trusted local practice while maintaining one evidence standard.

From Needs to Adoption

Proposed route for SME smart upgrading, applied technology and Macao-Hengqin conversion.

EVIDENCE DISCIPLINE

A completed demo is not equivalent to an adopted solution.

Better-Prepared Cooperation Leads

Proposed pathway for qualified international cooperation and investment-promotion opportunities.

Public Value Has Four Evidence Layers

Credible KPIs do not jump from attendance to impact. They establish each layer in sequence.

THE MEASUREMENT RULE

Move through confirmed inputs, outputs, outcomes and validated public value.

Attendance, certificates and introductions do not by themselves constitute an outcome.

A 12-Month KPI Atlas Makes Progress Reviewable

The dashboard translates the proposed annual plan into monthly pacing by public mandate.

MONTH 6 / PLAN PACING

PROPOSED METRIC REGISTER

CODE	MONTH 6 METRIC CONTEXT
SC	7 sessions; 2 partner sites; 31% assessment coverage
EY	5 partners; 18 mentors; 2 live briefs
ET	5 diagnoses; 2 PoCs; 1 continued adoption
IP	10 contacts; 4 leads; 1 formal action

EVIDENCE PROTOCOL

Finalise targets only after a baseline assessment, capacity review, resource approval and departmental agreement.

A 12-Month Pilot Earns the Right to Scale

Prepare, deliver and review before deciding whether to scale, adapt or stop.

EVIDENCE-BUILDING WINDOW

01 / PREPARE			02 / PILOT DELIVERY						03 / REVIEW		
M1	M2	M3	M4	M5	M6	M7	M8	M9	M10	M11	M12
●	●	●	●	●	●	●	●	●	●	●	●
Policy map, governance, partners, baseline and data/ethics rules.			Community cohorts, youth briefs, SME diagnosis and focused cross-border matching.						Outcome review, cases and scale/adapt/stop decision.		

SUGGESTED STARTING SCALE

3–5 community or education sites · 3–5 youth briefs · 5–10 SME pilots · verified cooperation-lead register — subject to baseline, resources and approval.

Evidence Governance Protects Credibility

A reviewable system protects both delivery quality and the integrity of public claims.

01

Policy mapping

Link every activity to a priority and accountable counterpart.

02

Baseline first

Confirm context before setting formal targets or commitments.

03

Stage gates

Decide whether to scale, adapt or stop using evidence.

04

Safeguards

Apply data, ethics and safeguarding rules from the start.

05

Transparent reporting

Report only what can be verified, with stated boundaries.

PUBLIC-USE BOUNDARY

Attendance, certificates and introductions do not by themselves constitute an outcome.

Build Evidence Together

Confirm the conditions for a focused pilot before making public commitments.

01 / CONFIRM

Focal points

02 / CHOOSE

Initial pilot scale

THE SHARED FIRST STEP

Start with a credible, evidence-building pilot.

Public commitments follow confirmed conditions.

03 / IDENTIFY

Live contexts

04 / AGREE

Shared baseline

Let AI be felt, used, connected and proven.
